PROFESSIONAL SUMMARY

Results-oriented **Data Scientist and Analyst** (Sains Data, ITERA) specializing in predictive modeling, operational analytics, text similarity algorithms, and automated ETL pipelines. Proven track record of optimizing sales reporting across 7 FMCG brands at PT DBO, building machine learning yield prediction models for industrial cement production at PT Semen Gresik, and developing AI recommendation engines. Proficient in Python (Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow), SQL, Power BI (DAX), and workflow automation.

RELEVANT WORK EXPERIENCE

PT. Depoguna Bangunan Online (DBO) — *Business Partner Consultant / Data Analyst*

Feb 2026 – Present

- **Sales Pipeline & Reporting:** Engineered automated sales data reporting pipelines for 7 building material brands (Rucika, Granito, Djabesmen, Royal, Fortuna, RB Shera, Tirta), maintaining 99.5% reporting accuracy across executive dashboards.
- **Sales Performance & Trend Analytics:** Analyzed transaction trends, product velocity, and SKU channel performance using SQL & Pandas to drive demand forecasting and quarterly business planning.
- **Process & System Troubleshooting:** Diagnosed operational data discrepancies between distributor feeds and central repositories, preserving continuous business operations.

PT Semen Gresik (SIG Group) — *Data Science Intern*

Jun 2023 – Aug 2023

- **Predictive Yield Modeling:** Developed machine learning regression models (Random Forest, Gradient Boosting) on industrial telemetry data to forecast hourly clinker production and cement strength, supporting manufacturing cost optimization.
- **Operational Integration:** Integrated model predictions into inventory planning and preventative maintenance schedules to reduce unexpected plant downtime.
- **Executive BI Dashboards:** Created interactive visual dashboards and analytical reports communicating model insights to plant engineers and operational leadership.

Institut Teknologi Sumatera (ITERA) — *Data Science Teaching Assistant*

Feb 2023 – Jun 2023

- **Instruction & Code Debugging:** Instructed modular Python programming, data wrangling (Pandas/NumPy), and algorithm debugging for 50+ undergraduate students, improving practical coding competency.

KEY PROJECTS & RESEARCH

• University Study Program Recommendation Engine (Binary PSO + KNN) (2025)

Architected a hybrid recommendation model combining Binary Particle Swarm Optimization (PSO) for feature selection with K-Nearest Neighbors (KNN), achieving **91.8% recommendation precision**.

• River Water Level Time-Series Forecasting (Finalist, Data Science Competition) (2023)

Engineered a 12-hour ahead LSTM recurrent neural network on hydrological sensor time-series data to predict river crest levels with a low **3.84% MAPE error**.

• Automated SKU Matching & NLP Text Similarity System (2024)

Built an NLP pipeline (TF-IDF + Cosine Similarity + XGBoost) matching noisy distributor invoice text to Master SKUs with **95.4% accuracy**, cutting manual reconciliation time by 88%.

EDUCATION

Institut Teknologi Sumatera (ITERA) — *Bachelor of Data Science (S.Si. Sains Data)*

Graduation: Jun 2025

GPA / IPK: 3.09 / 4.00 | **Relevant Coursework:** Machine Learning, Data Mining, Statistical Inference, SQL Databases, Time Series Analysis.

TECHNICAL SKILLS

Programming Languages:	Python (Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, Matplotlib), SQL, R (Basic), LaTeX
Data & Analytics Tools:	Power BI (DAX), Excel (Power Query, Openpyxl), Jupyter Notebook, Google Colab, Git, MongoDB
Core Competencies:	ETL Data Pipelines, Predictive Analytics, Time Series Forecasting, Text Matching / NLP, Business Intelligence

CERTIFICATIONS & AWARDS

- **Dicoding Academy Certifications:** Belajar Dasar Data Science, Belajar Dasar SQL, Memulai Pemrograman dengan Python, Intro to Financial Literacy (2026)
- **Honors & Leadership:** Finalist National Data Science Competition (StarCore Analytics, 2023) | Head of Academic Division (HMSD ITERA, 2022)
