PROFESSIONAL SUMMARY

Results-driven **Data Scientist and Analyst** (Sains Data, ITERA) specializing in machine learning, deep neural networks (Deep MLP, LSTM), multi-aspect NLP sentiment analysis, and operational data pipelines. Proven track record of optimizing sales reporting across 7 FMCG/building material brands at PT DBO, building predictive energy cost and cement strength models at PT Semen Gresik, and developing AI major recommendation algorithms. Proficient in Python (Pandas, NumPy, Scikit-learn, TensorFlow/Keras), SQL, Power BI (DAX), and workflow automation.

RELEVANT WORK EXPERIENCE

PT. Depoguna Bangunan Online (DBO) — Business Partner Consultant / Data Analyst Feb 2026 – Present

- Sales Pipeline & Reporting:** Engineered sales data reporting pipelines for 7 building material brands (Rucika, Granito, Djabesmen, Royal, Fortuna, RB Shera, Tirta), maintaining 99.5% reporting accuracy across executive dashboards.
- Sales Performance & Trend Analytics:** Analyzed transaction trends, product velocity, and channel performance using SQL & Pandas to inform demand forecasting and business planning.
- Process & System Troubleshooting:** Diagnosed operational data discrepancies between distributor feeds and central repositories, preserving continuous operations.

PT Semen Gresik (SIG Group) — Data Science Intern Jun 2023 – Aug 2023

- Clinker Production Energy Cost Optimization (ML):** Built predictive machine learning models forecasting energy expenditure (coal, solar, electricity) in cement clinker production to drive manufacturing cost efficiency.
- 28-Day Cement Strength Prediction (Deep MLP):** Developed a Deep Multi-Layer Perceptron neural network modeling relationships between 11 dependent process variables and 28-day cement compressive strength.
- Executive BI Dashboards:** Created interactive visual dashboards and analytical reports communicating predictive insights to plant engineers and operational leadership.

Institut Teknologi Sumatera (ITERA) — Data Science Teaching Assistant Feb 2023 – Jun 2023

- Instruction & Code Debugging:** Instructed modular Python programming, data wrangling (Pandas/NumPy), and algorithm debugging for 50+ undergraduate students, improving coding proficiency.

KEY PROJECTS & RESEARCH (GITHUB REPOSITORIES)

- Multi-Aspect Tourism Review Sentiment Analysis (KNN & Sastrawi) (Personal Project)**
Built a multi-output NLP sentiment classification system for 1,000 Indonesian tourist reviews across 3 aspects (Attraction, Amenities, Accessibility) using Sastrawi stemming, TF-IDF, and KNN, achieving **80.5% accuracy** on attraction sentiment.
- Clinker Production Energy Cost Optimization (Machine Learning) (PT Semen Gresik Project)**
Engineered multivariate ML regression models forecasting energy costs (coal, solar, electricity) in cement clinker manufacturing, supporting plant energy budgeting and operational planning.
- 28-Day Cement Compressive Strength Prediction (Deep MLP Neural Network) (PT Semen Gresik Project)**
Architected a Deep Multi-Layer Perceptron (Deep MLP) neural network predicting 28-day cement strength from 11 process variables, achieving high predictive correlation ($R^2 = 0.934$).
- University Study Program Recommendation Engine (Binary PSO + KNN) (Skripsi ITERA, 2025)**
Developed a hybrid recommendation engine combining Binary Particle Swarm Optimization (PSO) for feature selection with KNN classification, achieving **91.8% recommendation precision**.
- River Water Level Time-Series Forecasting (LSTM Neural Network) (StarCore Analytics Competition Finalist)**
Engineered a 12-hour ahead LSTM recurrent neural network on hydrological time-series sensor data with a low **3.84% MAPE error**.

EDUCATION

Institut Teknologi Sumatera (ITERA) — Bachelor of Data Science (S.Si. Sains Data) Graduation: Jun 2025

GPA / IPK: 3.09 / 4.00 | Relevant Coursework: Machine Learning, Deep Learning, Data Mining, Time Series Analysis, Statistical Inference, SQL Databases.

TECHNICAL SKILLS

Programming Languages:	Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Matplotlib), SQL, R (Basic), LaTeX
Data & Analytics Tools:	Power BI (DAX), Excel (Power Query, Openpyxl), Jupyter Notebook, Google Colab, Sastrawi, Git, SPSS
Core Competencies:	Machine Learning, Deep Learning (Deep MLP, LSTM), NLP Multi-Aspect Sentiment Analysis, ETL Data Pipelines, BI Reporting

CERTIFICATIONS & AWARDS

- Decoding Academy Certifications:** Belajar Dasar Data Science, Belajar Dasar SQL, Memulai Pemrograman dengan Python, Intro to Financial Literacy (2026)
- Honors & Leadership:** Finalist National Data Science Competition (StarCore Analytics, 2023) | Head of Academic Division (HMSD ITERA, 2022)
